Elkhart, Indiana 46514

Re: Request for information pursuant to Sec.104(e)(5) of CERCLA and  
Sec.3008 of RCRA, for the HIMCO LANDFILL SITE in Elkhart, IN.  
(Request rec'd 11/14/88).

Dear Ms. Swales:

The following answers to the referenced information request have been prepared to the best of our ability to do so. The following answers are referenced by question number:

1. AACOA is an aluminum anodizing facility. AACOA utilizes the sulfuric acid anodizing process to develop a corrosion resistant and aesthetically appealing finish on aluminum articles sent in by our customers. No manufacturing is performed by AACOA. All anodizing wastes are discharged from the plant via the city sewer in accordance with discharge permit parameters. Waste from packaging which consists of wood, steel banding, and cardboard is hauled away by Himco Waste-Away. No hazardous wastes are generated and/or disposed of. A small quantity generator ID number has been procured as a protective measure for any future needs. AACOA's SIC code is 3471.

2. No hazardous wastes have been generated and/or disposed of by AACOA. The Technical Manager is responsible for any waste disposal and treatment arrangements.

(page 1 of 2)

3. No arrangements have been made to dispose of hazardous wastes with Himco, Inc. or Himco Waste-Away or any other firm. Only 'domestic' trash hauling is contracted by AACOA.
